Models: Ti32, Ti25 and Ti10

FLUKE®

Technical Data

High performance thermal imagers have never been this affordable. This rugged. Or, this easy to use ... until now.

We, at Fluke, are never satisfied leaving the best tools in the hands of the elite, which is why we recently added a new member to our thermal imaging family. The new Fluke Ti32 combines a powerful 320x240 sensor into the award winning, rugged design of the Ti25 and Ti10, delivering the first industrial grade, high performance thermal imager. The result is strikingly crisp, detailed images that, blended with our patented IR-Fusion®, are sure to make a lasting impression. Don't take our word for it—see it yourself!

Fluke thermal imagers are designed, tested, and manufactured in the USA, and feature a two year warranty. Work in a harsh environment? Don't worry. These meet the stringent quality standards that Fluke products are known for worldwide. Able to withstand a 2 meter (6.5 foot) drop, they also meet the requirements for an IP54 rating against dust and moisture.

For added versatility and special applications, the Ti32 includes two field-swappable, rechargeable batteries. Use the optional telephoto and wide-angle lenses to bring distant and wide views into sharp focus.

Incredible performance at unbelievably low prices.

Fluke. *Not just infrared, infrared you can use.®*

Industrial, mechanical, electromechanical and general building maintenance.

Process, refractory insulation, tank and vessel levels, steam systems and traps, pipes and valves, etc.

Electrical, unbalanced loads, overloaded systems, wiring mistakes or component failure, etc.

IR-Fusion® Technology, standard on ALL Fluke thermal imagers

More than picture in picture

Infrared images alone can be difficult to understand, which is why Fluke pioneered IR-Fusion, a revolutionary marriage of visible and infrared images never before seen in commercial or industrial thermal imagers. Automatically capturing a visible image with every infrared image allows to you always know exactly what you're looking at.

Not all fusion is created equal

Don't be fooled by imitators. Patented IR-Fusion is the only solution with physical parallax correction, enabling the perfect alignment and blending of both infrared and visible images. While many manufacturers have attempted to duplicate Fluke IR-Fusion, none have been able to match it. Turn to Fluke IR-Fusion to deliver the industry's best thermal images.
