At a glance

One, two or three channels – R&S[®]HMC804x power supplies with their specifications and wide range of functions are ideal for use in development labs and industrial environments. Thanks to their high energy efficiency, the linear power supplies remain cool and quiet, even at maximum load. Practical interfaces and connectors allow users to work quickly and conveniently with the R&S[®]HMC804x, even in 19" racks.

The R&S®HMC804x family consists of three models with a maximum total power of up to 100W and a continuous voltage range from 0V to 32V. The one-channel R&S®HMC8041 delivers a maximum of 10A, the two-channel R&S®HMC8042 a maximum of 5A and the three-channel R&S®HMC8043 a maximum of 3A per channel. The two-channel and three-channel models enable users to connect multiple outputs in parallel or in series to increase the voltage or current. The outputs are galvanically isolated, floating, and protected against overloading and short circuits. Voltage, current and power values are output on a brilliant QVGA display.

The R&S®HMC804x offers a wide range of logging functions, an integrated energy meter and electronic fuses that can be individually combined for each channel, making it ideal for hardware developers, labs and industrial environments. Linear switching power supplies ensure high efficiency, for minimum heat dissipation even at full load. Developers and industrial users benefit from useful functions such as sequenced start of channels, EasyArb and EasyRamp functions that are directly programmable on the device, an analog input for external control of voltage values, an external trigger input for controlling channels and arb steps, and adjustable overvoltage/overpower protection for each channel.

All connectors, including SENSE, are available on the rear panel. A cage clamp facilitates rack installation and deinstallation. The LXI-compliant power supply can be controlled via LAN, USB or an optional GPIB interface. The CDC (virtual COM port) and TMC classes are supported for communications via USB. The remote control commands are based on the SCPI standard.

The R&S[®]HMC804x power supplies from the Rohde & Schwarz value instruments product range offer top quality and intelligent, practical functions at an extremely attractive price.

Key facts

Clear display of all measured parameters

- Brilliant QVGA color display (320 x 240 pixel)
- I Realtime voltage, current and power values
- High setting and readback resolution: 1 mV and 0.1 mA/1.0 mA (depending on current and model)
- Low residual ripple due to linear postregulation
- I High energy efficiency, low heat dissipation and quiet fan

Galvanically isolated, floating and short-circuit-proof outputs

- Front panel: 4mm (0.16in) safety sockets (R&S[®]HMC8041 including SENSE)
- I Rear panel: WAGO cage clamp for all channels including SENSE
- I Convenient parallel and serial operation via
- ∎ V/I tracking

Protective functions adjustable for each channel

- Overvoltage protection (OVP) for all outputs
- I Overpower protection (OPP) for all outputs
- I FuseLink (freely combinable electronic fuses)
- I FuseDelay (fuse activation delay)

Ideal power supply for hardware developers and labs

- I EasyArb function for user-definable V/I curves
- EasyRamp for simulating a start-up curve (directly programmable on device)
- I Sequencing (sequenced start of channels)
- Energy meter (measurement of energy output)
- Analog input for external control via voltage (0V to 10V) and current (4mA to 20mA)
- I Trigger input for starting/controlling EasyArb
- I Data logging to USB flash drive in CSV format

Remote control

- I USB interface (CDC/virtual COM port, TMC)
- LAN interface, LXI-compliant
- I Optional GPIB interface
- I Remote control via SCPI-based commands

Application	How the HAMEG R&S [®] HMC804x meets your needs
Engineering lab	 I FuseLink (freely combinable electronic fuses) I EasyArb function for user-definable V/I curves I EasyRamp for simulating a start-up curve (directly programmable on device) I Built-in energy meter I Data logging to USB flash drive in CSV format
Automatic test equipment (ATE)	 Analog input for external control via voltage (0 V to 10 V) and current (4 mA to 20 mA) Trigger input for starting/controlling EasyArb Sequencing (sequenced start of channels)
Production environment	 Rear connectors for all channels, including SENSE WAGO cage clamp on the rear panel for easy installation and deinstallation Remote control via SCPI-based commands LAN interface, integrated web server, LXI-compliant Optional GPIB interface (R&S*HMC804xG models)

Ideal for industrial environments

Power supply units in industrial production environments are often found in 19" racks. The HMC804x series instruments are very suitable for this use as all models can be integrated into 19" racks with the rack mounting kits HZC95. Two HMC8043 models built side by side result in 6 channels on 2 rack units. Please ensure sufficient space is available in the rack for adequate cooling (required minimum space above a HMC804x: 1 rack unit). Additionally, all front panel connectors plus SENSE lines are located at the back panel of the instrument. In order to facilitate the regular fitting-out for calibration the rear panel connector was designed with a WAGO cage clamp. The complementary part is available as option HZC40.

Base unit	Channels	Power	GPIB- Interface
R&S®HMC8043G	3	99W (33W/Channel, 3A (max.))	v
R&S®HMC8043	3	99W (33W/Channel, 3A (max.))	x
R&S®HMC8042G	2	100W (50W/Channel, 5A (max.))	v
R&S®HMC8042	2	100W (50W/Channel, 5A (max.))	x
R&S®HMC8041G	1	100W (10A (max.))	v
R&S®HMC8041	1	100W (10A (max.))	X

R&S[®]HMC8043, R&S[®]HMC8042, R&S[®]HMC8041 Power Supply

The specifications are based on a 30 min warm-up period.

Analog Interface				
Shunt resistance 420mA	250 Ohm			
Input resistance 010V	>10 kOhm			
Update rate V/I interface	10 changes/sec			
Response time V/I interface	<150ms			
Trigger level	TTL			
Trigger response time	<1ms			
Resolution	14 bit			
Arbitrary (EasyARB)				
Parameter	Voltage, current, time and interpolation mode			
Number of Points	512			
Dwell time	10ms 10min			
Repetition rate	continous or burst mode with 1255 repetitions			
Trigger	manually, interface or trigger input			
Logging				
Sampling speed	1000,100,10,13600 Sa/s			
Resolution R&S®HMC8043	1mV / 0.1mA (<100Sa/s); 10mV / 1mA (1000Sa/s)			
Resolution R&S®HMC8042/41	1mV / 1mA (<100Sa/s); 10mV / 10mA (1000Sa/s)			
Memory	Internal memory and External memory (USB-Stick)			
Maximum number of Points	limited by memory			
Sequencing				
Synchronicity	<100us			
Delay per channel	1ms 60s			
Remote interfaces	USB-TMC, USB-CDC (Virtual COM), LAN (LXI), GPIB (optional)			

Miscellaneous		
Input power option	100-240 VAC +/-10% 50/60 Hz	
Maximum input power	200W	
Fuse	T3, 15L 250V	
Operating temperature	+0°C+40°C	
Storage temperature	-20°C+70°C	
Humidity	580%	
Display	3,5″ / QVGA	
Dimensions (H x W x D)	222 x 88 x 280 mm	
Rack mount capability 1/2 19"	Yes	
Weight	2,6kg	

Recommended Accessories

HZC95

HZ72

19" rackmount kit for HMC series, 2 HE

IEEE-488 (GPIB) bus

interface cable

HZC40

Female connector with ejectors, 8x2-pole

Accessories included:

Line cord, printed operating manual, software-CD

Printed operating manual

HZ10

5x silicon test lead HZ10S: black, HZ10R: red, HZ10B: blue
